23456 x 60' = 14 0736° (14 is your whole minute) 0 736 x 60" = 4 416° (this is your seconds) DMS is now 5° 14' 4.416" A very good page Very helpful Now I guess someone needs to create a page that describes the difference between a question and a comment! I need to convert 21.. DMS includes degrees (°), minutes ('), seconds ("), with the corresponding symbols, and a size of any angle can be stated like, for example, 30 degrees, 10 minutes, 50 seconds.

Recent Comments i have the coordinates from zambia This site is wonderful I have the same issue as Mr.. To convert decimal coordinates to degrees minutes seconds (DMS), all you need to do is enter the latitude and longitude values, and press 'Convert' button.. thanks for formula on how to do this ! I had a big list to convert and one at a time would take forever.. What is DMS? DMS is the abbreviation for Degrees Minutes Seconds Degrees minutes seconds (DMS) are special type of units used for measuring angles, as an alternative to decimal way to stating the size of an angle.. Map Mouse Over Location Welcome to our online Lat Long to DMS converter Here, you can make the mentioned conversions easily and in no time.

It is a known fact that there are 360 degrees in a whole circle, with 1/60th of those being 1 minute, and 1/60th of one minute being 1 second.. The numerical values for latitude and longitude in decimal number format are:° for degrees, ' for minutes and '' for seconds.. World Geodetic System WGS84 standard is used on this latitude and longitude to DMS converter.. Scott, I also have a lot of coordinates to convert I am trying to convert latitude and longitude into Degrees Minutes Seconds and would love to have the formula if possible.
